Those of you who are a regular visitor to the stable's website, no doubt have been simply enthralled by all the new changes. And yet are you one of the very few that doesn't regularly log on?! Well . . ., the stable's website has been updated by using a more sophisticated program. The "store" web page now has an online order form that lists all the items that are carried. We have expanded the inventory to include a range of supplements that have been historically demanded. Special thanks go to Ashley for providing the expertise on which items should be carried. Ashley is extremely knowledgeable when it comes to horse nutrition, and is the "go to" person for what to feed and supplement your horse. Check out what everyone is talking about. <http://www.serranocreekranch.com/Store.html>

Did you know starting February 1st, the cats will be fed based on the number hits the store's web page receives? Using advance software we can see what happens if website visits fall. Only you decide their fate! →

Over the last two months we have had many requests to provide drinks. After much planning and market research, we are proud to announce the grand opening of "La Grotte de Boisson". But unlike fancy, overpriced French restaurants with their undersized portions, "the beverage cave" will be offering healthy(er?) drinks for sale at reasonable prices.

A large portion of the drink price normally goes to pay for a behemoth of a vending machine. These machines must (or should!) work in all

weather, be able to survive a terrorist attack (just watch Al-Qaeda get shorted a nickel), and sell a wide range of drinks. To do this, these machines don't come cheap. In truth a vending machine's purpose is solely for security. Just think that if everyone one paid for what they took,

then the \$4,500 refrigerator/ armored car combo could be replaced with a \$400 Sears special. Well here at the *La Grotte de Boisson*, we just *fou* enough to think that folks will pay for their drinks, and we've brought in a Sears. There's no need for a stuffy maitre' d to escort you to a table by the kitchen door, just check out the refrigerator behind that black screen door on the east side of the building. Hint: The payment box is mounted on the inside wall, directly behind you.

Is it possible that we have not carried your favorite beverage / feed / supplement? We're happy to see what we can do to meet your needs.

HOW MUCH DID IT RAIN? Try 7.81" or 1,548,040 gallons. That's a lot of water! That also means that horses are standing in their stalls far longer than normal. When they do get out, they can be quite unpredictable and dangerous. Simple rules like using stud chains when walking, giving wide berth to longing horses, and extra distance between riders is very prudent! **Safety Safety Safety**
